

## *Fast, Easy & Effective Cleaning Tips!*

- **Color-code your Enviro cloths by household job**—yellow for the toilet, pink for the rest of the bathroom, green for “clean” jobs like the kitchen, blue for windows & mirrors... Always clean from the cleanest to dirtiest area.
- **High-touch areas**-- use a damp **EnviroCloth™** once per week (or more) on areas such as the phone, remote control, light switches, doorknobs, computer keyboards & hand rails to cut down on sickness in your home and office.
- **“Ring around the tub”**-- use the scrubby side of the **Bathroom Scrub Mitt** with a little **Cleaning Paste** to clean the “ring around the tub”. Follow with the plush side of the mitt to remove any residue.
- **Enhance static charge in Dry Superior Mop Pad**-- use the **rubber brush** to clean your yellow **dry mop pad** and ramp up the microfiber’s static charge for maximum effectiveness.
- **Freshen up your blue Wet Mop Pad**-- use a small squirt of the **Norwex Stain Remover** and warm water between laundering. Rinse very well before hanging to dry.
- **Ultra-quick floor cleaning**-- simply spray vinyl, tile, or laminate floor with water from the **Norwex Spray Bottle** & follow behind with the **Wet Mop** for a quick cleaning. Add a capful of **Odor Eliminator** to water for a fresh clean smell.
- **Exfoliate** – wring out your **BacLoc™ Body Cloth** before use about once a week when washing your face with the cloth & water—this will exfoliate & rejuvenate your skin for a healthy-looking glow. Use caution on sensitive skin, and remember... NO scrubbing needed!
- **Carry a Travel-Size EnviroCloth** in your purse. Use damp to wipe notoriously “germy” areas like phones & computers, car steering wheel, shopping cart handles...
- **Window screens** –run a damp **Dusting Mitt or Bathroom Scrub Mitt (plush side)** over the screens – your screens will look like new.
- **Windows**--wash with wet **EnviroCloth™**, followed by polishing with dry **Window Cloth**. For hard to reach or larger windows use the **Norwex Mop**. Mop brackets secure the window cloth on mop base.
- **Washing walls** – remove greasy finger prints and grime with a damp **EnviroCloth™** OR wash the entire wall and ceilings with just water and the **Norwex Microfiber Mop**. The dry mop pad is ideal for removing drywall dust from walls.
- **Kitchen cupboards** – clean your kitchen cupboards inside and out with a damp **EnviroCloth™**.
- **Oven** – Try the non-toxic **Oven & Grill Cleaner** in combination with a **Spirinett**. Finish the task by removing any residue or grease with a damp **EnviroCloth™**, followed by a dry **Window Cloth**.
- **Mattresses** – spray with the **Norwex Mattress Cleaner** every 1-2 months - rid your mattress of pet dander, dead skin cells, & dust mite feces!
- **Light fixtures & ceiling fans** – Lightly spritz **Envirowand** with water; bend to fit your cleaning needs!
- **Various tough jobs** – the **Norwex Cleaning Paste** is excellent for cleaning stainless steel, showers, rust spots and more. “Elbow grease in a jar”!
- **If your microfiber gets a stale smell, do the Deep Clean!** Soak overnight in a concentrated solution of Norwex laundry detergent & hot water before laundering. Or may boil in pot of water (on stovetop) for 10 minutes, rinse in cold water & wring to dry (do not boil more than twice a year to avoid wear on cloths).
